7-35 Pleasant St	1-5 Central St	2-20 Grand Lake Rd
4-19 Miramichi St	2-35 Betts Drive	
6 Russell Dr.	5 Ray St	

To permit the replacement of a faulty water valve on Main Street it will be necessary to shut down the watermain supplying to your residence. **The work has now been scheduled for Wednesday, August 18, 2026**, weather permitting. During this time period, **your water service will be shut off**. In case of bad weather, the work will be re-scheduled for the following day.

Due to the nature of the work, the New Brunswick Department of Health has requested that the affected area on this water system be put on a precautionary boil order from the time the water is shut off (August 18, 2026). Please remain on the precautionary boil order until tests are completed and the boil order has been lifted by the Village Doaktown.

The following instructions and recommendations from the New Brunswick Department of Health are to be followed during the precautionary boil order:

1. During a boil water advisory, it is important that all water destined for drinking, preparing infant formulas and juices, making ice cubes, washing fruits and vegetables, cooking and dental hygiene be held at a rolling boil for 1 minute. Unless advised differently by the Department of Health, under most circumstances it is not necessary to boil water used for other household purposes. Adults, adolescents and older children may shower, bathe or wash using tap water but should avoid swallowing the water. Toddlers and infants should be sponged bathed and caregivers need to ensure no water is drunk or swallowed. Dishes and laundry may be washed in tap water, either by hand or by machine, unless advised differently by a Department of Health representative.

To minimize the potential inconvenience of this disruption to your service, we recommend the following:

1. Close the water valve where the water line enters your basement and close the circuit breaker for your hot water heater.
2. When the water service is restored, run your cold water first for a few minutes or until clear water shows and then open the circuit breaker for your hot water heater. **ONLY AFTER**, run your hot water until clear water shows.

We regret any inconvenience caused by this work and thank you for your cooperation.

If you have any questions concerning this subject, please feel free to contact us at the numbers below.

Sincerely,
Krista Lambert
